# Business Capabilities

**■ High-Speed Processing**

TECHNO P10 terminal features a powerful quad-core processor and advanced hardware, designed to expedite the process of selling products and services. By faster processing this terminal makes business sales and service delivery faster.

**■ Advanced Connectivity**

This device supports various telecommunication networks, including 3G, 4G, Wi-Fi and also Bluetooth, enabling it to operate smoothly and without interruptions in various environments.

**■ High-Quality Screen**

The 6.5-inch color touchscreen display of the TECHNO P10 offers a resolution of 720 x 1600, providing ample space for efficient and effective sales and service operations.

**■ Versatile Payment**

TECHNO P10 smart terminal is a highly versatile and reliable device that can be used in various settings, providing fast and secure payment processing for customers and businesses. Multiple card reading options, in addition to the camera, capable of reading barcodes, makes this terminal an ideal choice for businesses looking to improve their payment processing capabilities and enhance the customer experience.

**■ Up-to-day Security**

The terminal's design and construction are based on the security standard PCI PTS 6.x, enabling the terminal to process transactions with maximum security. Thus, the terminal's owners can safely and securely use their electronic payment processing on this platform.
