# Business Capabilities

## ■ Fast Transaction Processing

TECHNO Q80 Payment Terminal uses Prolin OS and Powerful hardware to make sure of fast transactions and least waiting time for the customers.

## ■ High Quality Display:

The device has a 4" full color and touch display alongside a full numpad to make sure of a good user experience and best viewing angle for both the merchant and the customer.

## ■ Latest Security Certifications:

TECHNO Q80 terminal is designed with security in mind. The device complies with PCI PTS 6.x Security Standard, ensuring that all transactions are secure and protected against fraud and oth-

er types of cybercrime.

## ■ Fast Printer:

The thermal printer in this device has a 50 lines/s printing speed and the size and quality of printing makes sure of a well-printed receipt for the customers.

## ■ Great Build Quality:

Former generations of this device have been used for more than 5 years in many businesses and they have a reputation for the build and performance quality. This generation has maintained the well-known design and with updated security certifications, can guarantee multiple years of seamless usage for merchants.
